# PALLET LABELING
INTELLIGENCE

Selecting the perfect, turnkey **pallet labeling solution** is as easy as ordering from a menu.

Floor Wrapper Pallet Labeling
Turnkey Solution starting at $35,000

- Tightly integrated, state of the art EvoLabel printer applicator
- Pallet Labeling Intelligence software and workstation
- Manual labeler for partials and exceptions
- Scan to verify case to pallet association
- Standard flat file or API data interface options to use your existing software systems and data

Optional for this System
- Safety fencing and controls to meet OSHA standards
- Floor Wrapper integrated to the Pallet Labeling Intelligence system

Manual Pallet Labeling
Turnkey Solution Starting at $10,000

- Print by schedule, product and/or picture
- Process and workflow enforcement
- Scan to verify the case to pallet prior to reporting goods receipt
- Packaging counts based on scanned pallets
- Easy partial pallet logic
- Advanced data interfacing to existing software and controls systems

Optional for this System
- Scan every case to the pallet by time stamped case serial number

Options for Every System

- Advanced data interfacing to existing software and controls systems
- All consumables necessary to provide the best labeling for your application

Automatic Pallet Labeling

Pallet Labeling Premium from $50,000 to $100,000

- Multiple lines and products per wrapper
- Tightly integrated, state of the art Evo Label printer applicator
- Proven pallet identification camera system using Apis tracking codes on cases using your existing case printers and coders.
- Pallet Labeling Intelligence software and workstation
- Manual labeler for partials and exceptions
- Standard flat file or API data interface options to use your existing software systems and data.

* These solutions may also be used with your existing printer

Pallet Labeling Plus from $35,000 to $65,000

- One line per automatic palletizer and wrapper
- Tightly integrated, state of the art printer applicator.
- Pallet Labeling Intelligence software and workstation
- Manual labeler for partials and exceptions
- Standard flat file or API data interface options to use your existing software systems and data.

Standard Pallet Labeling from $20,000 to $45,000

- One line per automatic palletizer and wrapper
- Tightly integrated, state of the art printer applicator.
- Self-contained, database driven pallet labeling for one line per wrapper.
- Options to apply 1, 2, 3 or 4 labels per pallet as well as automatic height adjustment.

Pallet Labeling Intelligence by Apis Wise

The critical connection between production, packaging and inventory is pallet labeling, yet many companies underestimate the importance of this "sticker" on multiple aspects of their business.

Fully Automatic Pallet Labeling

As automation in palletizing and warehousing expands rapidly Apis Wise Pallet Labeling Intelligence addresses the need to incorporate accurate data and processes to ensure 100% inventory accuracy.

Semi-Automatic Pallet Labeling

Floor wrappers are used in every packaging and manufacturing plant, yet they are limited to putting film on pallets. The Pallet Labeling Intelligence Solution uses floor wrappers to automate pallet labeling processes with scan to verify process improvement and workflow enforcement.

Manual Pallet Labeling

Manual pallet labeling is often the most high risk process with so much reliance on the operator. Pallet Labeling Intelligence uses processes, workflow enforcement and systematic checks and balances to bulletproof manual pallet labeling.
